

The Cocoon Papers

VERSION 1.0 · JULY 2026 · TON NETWORK

00

Abstract

Most whitepapers are long because they have something to hide. This one fits on a page: \$COCOON is a community memecoin on TON, wrapped around the Cocoon narrative, carried by a Telegram-native swarm, and marked by a single piece of identity: the 3D Render Easter Egg.

To join is simple. You do not apply, stake, or grind. You wrap yourself in the silk. You *Be Cocoonized*.

01

The Cocoon

Cocoon is the confidential compute network in the Telegram orbit, an open network where AI workloads run privately on distributed GPUs. It stands for a simple idea: **privacy is not a feature, it is a right**.

\$COCOON is not that network and is not affiliated with it. It is the meme that formed around the story: the crowd outside the chrysalis, chanting. Loud on the surface, private underneath.

02

The Coin

One ticker, one chain, one pool. No presale, no promised utility, no roadmap theater.

TICKER	\$COCOON
CHAIN	TON (The Open Network)
TRADES ON	DeDust
SUPPLY	100M, fixed
UTILITY	The meme. That is the honest answer.
CONTRACT	EQBiyZMUXvdmRYFuk3_R5uPdsR2ROI9mes_15-jl1tIQDhDK

Anything on another chain or address is not \$COCOON. Verify before every swap.

03

The Egg

Every movement needs a face. Ours is the 3D Render Easter Egg, the Telegram collectible the community adopted as its identity marker after it surfaced on profiles at the center of the Cocoon story. Holders wear it; the swarm recognizes it on sight.

It does not stand alone. The Skull Flower Cocoon is the second collectible in the set, and holding either gift opens the Gated Cocoon Private Club. The live board on cocoonmeme.com tracks both models, ranked and updated from public data.

04

The Swarm

The swarm is the product. It raids, it spins stickers, it keeps the chart company at 4 a.m. It lives on Telegram because \$COCOON is Telegram-native by birth, not by strategy. Moderators moderate, holders hold, posters post. Energy is visible.

05

How to Be Cocoonized

1. Get a TON wallet (Tonkeeper, Telegram Wallet, or similar).
2. Fund it with TON.
3. Swap TON for \$COCOON on DeDust. Verify the contract first.
4. Join the Telegram and say you arrived.
5. Optional, honored: wear the 3D Render Easter Egg or the Skull Flower Cocoon on your profile.

That is the entire protocol. The silk does the rest.

06 · Disclaimer

\$COCOON is a memecoin created by a community, for a community. It has no issuer making promises, no expectation of profit from the efforts of others, and no utility beyond culture. It is not an investment, not a security, and not financial advice. Prices of memecoins are extremely volatile; never swap more than you can happily lose. \$COCOON is an independent community project and is not affiliated with, endorsed by, or connected to Telegram, TON Foundation, or the Cocoon network.

Be Cocoonized.
